

Environmental Policy ProPHOS Chemicals Srl - All.2 OS, Rev.01 of 7/12/21

The global markets evolution and the need of a greater respect for the environment make us manage our organization with a specific attention and awareness towards environmental protection issues.

ProPHOS Chemicals defines itself as a “green” chemical industry company and it works for environmental protection including prevent pollution, use of sustainable resources, mitigation and research for solutions for the adjustment to climate change.

Thus our company states through this document its commitment to the compliance with environmental legislation and regulations, in force and future, applicable for pollution prevention and for the environmental performances continuous improvement.

Our key assets:

- Constant monitoring of the way ProPHOS Chemicals products and services are designed, manufactured, commercialized, used, and disposed. This relying on a life cycle perspective that can prevent unintended displacement of environmental impacts to another stage of the life cycle.
- Minimization, as far as possible, of the consumption of electricity, water and fuel.
- Commitment to protecting the environment from damage and degradation deriving from activities, products and services of our organization.
- Water and air quality control of the premises, in order to protect biodiversity and ecosystems.
- Reduction of waste production, disposable packaging and/or by-products, in order to facilitate their recovery.
- A wide offer of services such as waste powder withdrawal, waste classification chemical analysis and waste destination to specialized plant for its recovery as fertilizer.
- Pollution prevention and environmental risks minimization related to the activities and the products of the company, in order to protect the business, working on environmental risk assessments and continuously monitoring critical parameters.
- A commitment to fulfil legal and interested parties’ obligations.
- Continuous improvement of our performances, relying on concrete and verifiable data.
- Recurring and regular informational, educational and update activities, addressed to the whole ProPHOS Chemicals staff to promote environmental responsibility and awareness.
- Highest communication, transparency and awareness addressed to the local community and to the customers on the environmental issue to obtain and enhance trust in our activities and products.
- The assurance that this document is accessible to anyone interested.

Furthermore, the Management defines evaluable markers through which setting environmental objectives with development organization programs.

In order to ensure objectives achievement and the realization of the above-mentioned commitments, the Management shall provide necessary organization and resources, watching so that the Environmental Management System results as optimal and suitable.

Thus, the aim of ProPHOS Chemicals is to obtain and maintain its Environmental Management System in compliance with UNI EN ISO 14001:2015 standard and oriented toward the continuous improvement of environmental performances.
